

ENERGY MANAGEMENT SYSTEMS

INTERNAL AUDITOR

Course aim and objectives:

The course provides participants with the knowledge and tools for becoming qualified to audit an energy management system integrated in marine management systems. Focused attention is targeted on the development, implementation and completion of the audit process for continual improvements of the energy management system. The audit process is a critical assessment factor relevant to consumption and effective saving methods for optimization of energy efficiency and energy management.

Course main elements:

- ISO 50001:2018 requirements
- Energy management and continual improvement
- Audit stages and process
- Preparing and reviewing the audit program
- Conducting, reporting and follow up audit verification
- Audit investigation and communication techniques
- Non-conformity identification and handling
- Practical exercises and final examination

Course participation:

The course is open to shipping company safety, quality and environmental managers, DPAs, company internal auditing team and shipboard team involved in the auditing process.

Course duration: 2 days

This training program is currently provided in 12-hours with real time instruction through a dedicated e-platform in 3 four-hour pre-scheduled interactive web-based learning sessions.
