Navigational Safety Assessments

Course aim and objectives:

This course provides participants with the principles for safety of navigation, techniques, team dynamics, effective bridge resource management, ship-handling and the use of modern navigational equipment with reference to TMSA 3 Element 5. The course also makes extensive reference to the human factor, the skills, teamwork and ongoing training required for effective and safe navigation with examples to be avoided leading to unsafe conditions and incidents.

Course main elements:

- Introduction to navigational safety principles
- Procedural compliance
- Bridge teamwork and effective resource management
- Skills and ongoing training
- Emergency conditions and response
- Navigational Assessments
- Practical examples and workshops

Course participation:

The course is open to shipping company managers, operators, designated person(s), superintendents, masters and shipboard officers

Course duration: 1 day

This training program is currently provided in 6-hours with real time instruction through a dedicated e-platform in 2 three-hour pre-scheduled interactive web-based learning sessions.
