

MANAGEMENT OF CHANGE & RISK ASSESSMENT

Course aim and objectives: This course provides participants with knowledge for controlling and managing effectively changes which are inevitable in the contemporary marine business environment. Essential, prior to implementing any change, is the risk assessment process as a tool for safeguarding the integrity of the system, operational efficiency, and continual improvement. The step-by-step approach, for managing marine changes without affecting operational safety, is thoroughly explained. Reference is also made to ISM Code, OCIMF's TMSA and DRY-BMS industry standards for best practice guidance and implementation.

Course main elements:

- Introducing and defining Management of Change
- Changes affecting company's SMS
- Change initiators, reasons, and need for change
- Management of Change process
- Review of SMS Risk Control Measures
- Change factors compromising the integrity of the system
- Best practice guidelines for continual improvement
- Practical workshops and exercises

Course participation: The course is open to shipping company managers, superintendents, masters, and senior shipboard team members involved in the effective management and implementation of changes as a tool for incident prevention and continual improvement of the system

Course duration: 1 day This training is provided with real time instruction through zoom platform in a pre-scheduled interactive learning session

Course Schedule: 10:00 – 17:00 hours
