ISM Code Requirements

Course aim and objectives:

The ISM Code requires shipping companies managing and operating ships to implement a safety management system. The ISM Code requirements are explained to course participants including the Code's risk control measures on safety and pollution prevention for reducing human error. The responsibilities under the Code of shore personnel and crew members are thoroughly explained.

Course main elements:

- Introduction to ISM Code
- Safety management system implementation
- ISM Code requirements and risk controls
- Verification and certification requirements
- Practical exercises and final examination

Course participation:

The course is open to all shipping company office personnel and ship-board members who need to understand and implement the ISM Code.

Course duration: 1 day

This training program is currently provided in 6-hours with real time instruction through a dedicated e-platform in 2 three-hour pre-scheduled interactive web-based learning sessions.
